

A schematic diagram of a human head and neck in profile, showing the placement of an electrode array. The array, labeled 2, is positioned along the spine and neck. It includes a main cable 2 with segments 2a and 2b. A control unit 4b is connected to the cable via a line 4. A power source 6 is also connected. Labels P, E, EW, M, PC, and H indicate specific anatomical or electrode locations.
